

Tunisia 2025: New ToT for ANETI.

February 15, 2025

In the period 28-31 January 2025 the third Training of Trainers (ToT) took place in Hammamat. This event was arranged by ANETI – the Tunisian Ministry of Employment and Vocational Training, and is the first project together with ANTI (The Tunisian National Agency for Employment and Self-Employment) to start the Youth Entrepreneurship program.

The projects will be coordinated by the Ministry of Employment and Vocational Training and have a timeframe of 3 years with yearly revisions. The projects are financed by the Norwegian Ministry of Foreign Affairs.

The project with ANETI is aimed at supporting their already existing programs with practical tools and methods. The aim is also to develop a Training of Trainers group that gradually will take over the program. The target group for this project is entrepreneurs who are looking for opportunities to start their own businesses.

So far three trainings have been conducted, with very good evaluation results.

From the 28th to the 31st of January a training session for 27 trainers was arranged in Hammamat in Tunisia. These ToT participants are now ready to start BPD training in their centers.

All in all, more than 50 trainers are now ready in Tunisia to start first training of youths. BIP will organize more activities for the future so trainers can get more skills of a higher level.
